

Consulting

Overview

We create customized solutions to fit your needs and situation. We strive for process elimination, simplification, and automation to enable your company to expend your efforts where it is needed. This saves you time and money and will improve your business.

Methodology

We work with our clients to get the correct requirements and prepare prototypes and description documents as appropriate to ensure that customer expectations are understood. We use our full resources to achieve these expectations and customer goals. The project is not completed until the customer has successfully integrated our solution into their business process and received substantial benefits.

Offering

We offer a full line of services to help your business. Our offering includes the following:

- Database Solutions

Automate your office with services from an award winning database designer. We create customized database solutions to fit your needs.

- Network solutions & systems support

Have your network running efficiently and eliminate downtime.

- Web design

Create a web site that projects the proper image for your company.

- Wireless applications

Enable your external sales or support staff to have full access to the information they need to effectively complete their tasks.
