

## Metcomp Releases Free Software

Open source products have benefited Metcomp and its customers greatly. We have decided to give back to the open source community. Metcomp is releasing MetPhoto, a nukeleague player photo block.

MetPhoto is a PHPNuke block that randomly displays rotating player photos for a league in NukeLeague.

See it in action on JewCentral. You can download it at [Metcomp's Free Software Site](#)

More addons are coming soon.
